**Expected learning outcomes of the 2017 graduate international programs in Anatomy and Structural Biology.**

<table>
<thead>
<tr>
<th>Master of Science Program in Anatomy and Structural Biology (International Program)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Graduates exhibit honest, responsible, disciplined, and punctual behaviors including complying with regulations; and maintain ethical standards in academic and research contexts.</td>
</tr>
<tr>
<td>2. Graduates are able to acquire up-to-date knowledge and thorough understanding of the principles and theoretical aspects of anatomy and structural biology.</td>
</tr>
<tr>
<td>3. Graduates demonstrate their proficiency in the use of research equipment in the field of anatomy and structural biology.</td>
</tr>
<tr>
<td>4. Graduates are able to analyze, synthesize, design, and carry out research on the anatomy and structural biology in a well-organized format.</td>
</tr>
<tr>
<td>5. Graduates possess a good relationship, skills in teamwork, and responsibility for the duties assigned.</td>
</tr>
<tr>
<td>6. Graduates demonstrate essential skills on numerical and statistical analysis involving in their research, with the use of appropriate information and communication technology.</td>
</tr>
<tr>
<td>7. Graduates are able to communicate in oral and written modes and present their work through international publications.</td>
</tr>
